Exam : Cisco 350-030

Title : CCIE Voice Exam

Update : DEMO

1. You are the IP Telephone Manger in MaceCert.com. How to implement a non-standard softkey template after selecting a softkey template?

- A. copy the template and rename it; insert it; modify the template and update the changes.
- B. rename it; modify it and update the changes.
- C. rename it; insert it; modify it and update the changes.
- D. name it; update it; modify the template and update the changes.

Answer: A

2. Media Gateway Control Protocol (MGCP) is a signaling and call control protocol used within a distributed Voice over IP system. Which port(s) must be opened on an IOS firewall to allow successful MGCP (Media Gateway Control Protocol) message exchanges between a CallManager and an IOS MGCP PRI gateway?

- A. TCP 2000 and 2002
- B. TCP 2427 and UDP 2428
- C. UDP 2427 and 2428
- D. UDP 2427 and TCP 2428

Answer: D

3. You are a network administrator at MadeCert. Your newly appointed MadeCert trainee wants to know what the term "MGCP backhaul" means.

What will your reply be?

- A. Transporting T1 CAS messaging to the MGCP Call Agent across IP.
- B. Transporting ISDN Q.931 messaging to the MGCP Call Agent across IP.
- C. Transporting ISDN Q.921 messaging to the MGCP Call Agent across IP.
- D. Transporting ISDN Q.931 messaging into MGCP events to the MGCP Call Agent.

Answer: B

4. You are the IP Telephone Manger in MadeCert.com. MadeCert has 2 remote sites and one main site. Each site has a CME router with many IP phones in an IPT deployment. The Network Administrator wants to provide all of the phones voicemail access using CUE. Which way can CUE be deployed?

- A. Cisco Unity Express and the CME gateway at each site must be collocated in the same router chassis providing voicemail access to local IP phones registered to local CME.
- B. One Cisco Unity Express can be used at the main site with CME router providing voicemail access to all the 3 sites.
- C. One Cisco Unity Express with CME can be used at the main site to provide voicemail access to the IP phones at the main site. Another Cisco Unity Express with CME can be used at one of the remote sites to provide voicemail access for all of the IP phones at the two remote sites.
- D. Cisco Unity Express and the CME gateway at each site may NOT be collocated in the same router chassis providing a voicemail access to local IP phones registered to local CME.

Answer: A

5. A Certificate Trust List (CTL) file is created when you install and configure the Cisco Certificate Trust List (CTL) client on a Windows 2000 server. It can even be installed on a CallManager server. Device, file, and signaling authentication rely on the CTL. The CTL file contains entries for the following servers or security tokens .Which two the following are correct statements about Certificate Trust List (CTL) File?

- A. The CTL file is a list of devices and credentials that a phone should trust on the network.
- B. The CTL file is signed by administrator workstation password.
- C. The CTL file contains identity, public key and role information.
- D. The CTL file is loaded to the phone each time when authentication is required.

Answer: AC

6. On which of the following does the maximum device weight capacity a Cisco MCS server depend? (Choose three.)

- A. The quantity and the type of phones configured on the Cisco MCS server.
- B. CCM software release version.
- C. The amount of memory, CPU and I/O throughput.
- D. The server model and type.

Answer: BCD

7. A Cisco CallManager group specifies a prioritized list of up to three Cisco CallManagers. The first Cisco CallManager in the list serves as the primary Cisco CallManager for that group, and the other members of the group serve as secondary and tertiary (backup) Cisco CallManagers .A CallManager Group can provide which two features to your call processing system? (Choose 2)

- A. Disables you to distribute voice mail support across multiple Unity servers
- B. Enables you to distribute the control of devices across multiple Cisco CallManagers
- C. Enables you to distribute voice mail support across multiple Unity servers
- D. Support for redundancy by enabling you to designate a primary and backup Cisco CallManagers for each group

Answer: BD

8. You are the IP Telephone Manger in MadeCert.com. which Protocol will satisfy the following requirements: It has a mechanism for a centralized dial-plan

The endpoints are considered to be unintelligent

The protocol must be text-based

- A. SIP
- B. H.323
- C. MGCP
- D. SCCP

Answer: C

9. Migrating from TDM voice requirements to VoIP usually does not cause migration issues for customers who expect to be:

- A. Deploying in a Green-Field scenario.
- B. Fully IP in 1 to 3 years.
- C. Fully IP within 12 months.
- D. All of the above.

Answer: A

10. The Cisco IP Voice Media Streaming Application provides voice media streaming functionality for the Cisco CallManager for use with MTP, conferencing, and music on hold (MOH). Which two are functions performed by Cisco Media Streaming App Service?

- A. Provides SCCP stack for 4 software devices: ANN, CFB, MOH, and MTP
- B. Supports DB change notification processing
- C. Converts new MOH source files to separate WAV files for MOH codecs
- D. Adjusts volume levels of MOH source files

Answer: AB

11. You are the IP Telephone Manager in MadeCert.com. An IP phone is connected to a Cisco inline power switch Port. Switch is running IOS image on it. The switch port is acting as a trunk and is running both Voice and Data VLAN configuration on it. You would like the IP Phone connected to switch port in voice VLAN to set layer 2 priority of all the packets coming from PC to default 0. Which IOS CLI can help you achieve that goal?

- A. switchport access vlan 10
- B. switchport priority extend cos 0
- C. switchport trunk priority cos 0
- D. switchport mode access priority extend cos 0

Answer: B

12. Your newly appointed MadeCert trainee wants to know what type of signaling can provide automatic Number Identifications (ANI) on a T1/E1 line.

What will your reply be? Select two.

- A. E&M-fgd
- B. Loop Start
- C. PRI
- D. E&M-fgb

Answer: AC

13. You are the IP Telephone Manager in MadeCert.com. MadeCert has a headquarters with a centralized

CallManager and 5 branch offices. All the branch offices have ext 1000-1150. To allow inter-office calls each office has been assigned a 3 digit site code. To call between sites, users will dial an access code followed by the 3 digit site code and the extension. How these inter-office access codes should be configured?

A. A translation pattern is created for each office and placed in a partition available to all phones. The translation pattern strips the access code and site code and is assigned a Calling Search Space that includes only the phones located in the office.

B. A translation pattern is created for each office and is placed in a partition available to the phones at that office. The translation pattern strips the access code and site code and is assigned to Calling Search Space that includes all local phones.

C. A route pattern is created for each office and placed in a partition available to all phones. The route pattern strips the access code and the site code and routes the call to the remote office's gateway.

D. A route pattern is created for each office and placed in a partition available to phones at that office. The route pattern strips the access code and site code and routes the call to the remote office's gateway.

Answer: B

14. You are contracted as a network administrator for a small company, MadeCert Inc.

Your newly appointed MadeCert trainee wants to know What settings have to be in place in order to pass hook-flash on h.323 from FXS to FXO:

What will your reply be?

A. connection trunk must be configured on the voice-port (FXS) and (FXO)

B. connection plar must be configured on the voice-port (FXS)

C. connection trunk must be configured on the voice-port (FXS) and (FXO)

D. connection plar must be configured on the voice-port (FXS) and (FXO)

Answer: D

15. You are the Cisco Configuration Assistant in MadeCert.com. How to determine if there is a JTAPI memory leak in a CallManager server?

A. Check the available physical memory of the server.

B. Review all CCM User logs

C. Check for changes to IP phone settings

D. Determine if dialing the voice mail pilot number fails to connect to voice mail

Answer: A

16. You are the IP Telephone Manager in MadeCert.com. Which statement is incorrect regarding dialing domain functionality in Cisco Unity?

A. They are multiple Unity servers that are handling subscribers that are on a single switch or networked switch

B. All users in the dialing domain should be able to pick up their phones and dial each other directly without

having to dial trunk access codes or use outside lines.

C. They are also necessary if the Unity servers involved don't have overlapping dial plans.

D. Their IDs are stored on the primary location object. Multiple primary location objects with the same value for this ID make up a dialing domain.

Answer: C

17. You are a network administrator at MadeCert. MadeCert has a Cisco voice gateway that will be connected to a PBX/PSTN-switch via ISDN (PRI, QSIG, BRI).

Which attributes of the PBX/PSTN-switch must you know to understand which features to configure on the voice GW in order to connect successfully to the PBX/PSTN-switch? (Choose two.)

A. Whether Q.921 or Q.931 is supported by the PBX/PSTN-switch.

B. Whether H.225 or H.323 is supported by the PBX/PSTN-switch.

C. Whether the network or users side is supported by the PBX/PSTN-switch.

D. What PRI/BRI switch-type is supported by the PBX/PSTN-switch.

Answer: CD

18. You are the IP Telephone Manager in MadeCert.com. Two department of your company need to exchange Unity voice messages using VPIM. Calls from Dept A to Dept B are made using a site code of "919" followed by the recipient's 4 digit extension. The primary extension in Unity is the user's four digit extension. Which of the following configurations on Dept A's Unity server will allow messages to be forwarded between Unity systems using the same seven digit dialing that is used to place direct calls? (Choose 3)

A. Add the seven digit number as an alternate extension to each VPIM subscriber

B. Configure the Extension on the VPIM subscriber to "919" plus the recipient's four digit extension

C. Configure the Remote Mailbox Number on the VPIM subscriber to the recipient's four digit extension

D. Configure the Dial ID to "919"

Answer: BCD

19. You are the IP Telephone Manager in MadeCert.com. When configuring IP Manager Assistant (IPMA) in a shared line mode, how are the manager and assistant Directory Numbers (DN) configured?

A. They both share the same directory number (DN).

B. They have separate directory numbers (DN), but share an IPMA directory number.

C. They each have separate directory numbers (DN).

D. They share a directory number (DN) and an IP Manager Assistant (IPMA) directory number.

Answer: A

20. Which of the following statements is an attribute of ISDN Non-Facility Associated Signaling (NFAS)?

A. Enables the D-channel to transmit "data" information unrelated to any voice call, such as inter-switch status updates.

- B. Applicable to voice calls and PRI only, but not data PRI calls.
- C. Is available on both T1 and E1 PRIs.
- D. Single D-channel controls B-channels on the same T1 span, as well on other T1-spans.

Answer: D

ExamSavior.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [HuaWei](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on. And help you pass any IT Certification exams at the first try.

You can reach us at any of the email addresses listed below.
