

# The best learning assistants

**Exam : Adobe 9A0-701**

**Title : ColdFusion MX Developer  
Exam**

**Update : DEMO**

1. What SQL clause is required when using a HAVING clause?

- A. WHERE
- B. ORDER BY
- C. GROUP BY
- D. INSERT INTO

**Answer: C**

2. What clauses are valid for an SQL UPDATE statement? (Choose two)

- A. SET
- B. INTO
- C. WHERE
- D. VALUES

**Answer: AC**

3. Given the query,

```
<cfquery name="qNames" datasource="dsn">
```

```
SELECT s_fname, s_lname
```

```
FROM student
```

```
</cfquery>
```

What is the correct FROM clause in the query of queries?

```
<cfquery dbtype="query" name="qNamesOrdered">
```

```
SELECT s_fname, s_lname
```

```
FROM ????
```

```
ORDER BY s_lname
```

```
</cfquery>
```

- A. FROM query
- B. FROM student
- C. FROM qNames
- D. There is no correct FROM clause because, an error would result since no datasource attribute is used in the second query.

**Answer: C**

4. An Employees table contains 10 records and a Departments table contains 5 records. Given the code, how many records will the query produce as a result set?

```
<cfquery name=qGetEmp datasource=dsn>
```

```
SELECT Employees.FirstName, Employees.LastName, Departments.DepartmentName
```

```
FROM Employees, Departments
```

```
ORDER BY Departments.DepartmentName
```

</cfquery>

- A. 0 records.
- B. 5 records.
- C. 10 records.
- D. 50 records.

**Answer: D**

5. What <cfquery> attributes are used in the implementation of query-based caching? (Choose two)

- A. cachedtime
- B. cachedafter
- C. cachedquery
- D. cachedwithin
- E. querycached

**Answer: BD**

6. In many development environments URL or form variables in a dynamic query can append malicious SQL statements to existing queries. What ColdFusion tag is needed to solve this problem?

- A. <cfreturn>
- B. <cfparameter>
- C. <cfqueryparam>
- D. <cfprocessingdirective>

**Answer: C**

7. What statement best describes a primary key?

- A. A single column that uniquely identifies a row.
- B. One or more columns that uniquely identifies a row.
- C. A column that references another column in a master table.
- D. A column that either uniquely identifies a row or has no value.

**Answer: B**

8. How does the WHERE clause affect the SELECT statement?

```
SELECT *  
FROM Employee  
WHERE 1=1
```

- A. an error occurs
- B. returns the first row
- C. all rows are returned
- D. returns the row with the primary key = 1

**Answer: C**

9. What WHERE clause is equivalent to the WHERE clause on the SELECT statement below?

```
SELECT *
```

```
FROM Customer
```

```
WHERE lastname IN ('Smith', 'Jones')
```

- A. WHERE lastname = 'Smith' OR 'Jones'
- B. WHERE lastname = 'Smith' AND lastname = 'Jones'
- C. WHERE lastname BETWEEN 'Smith' AND 'Jones'
- D. WHERE lastname = 'Smith' OR lastname = 'Jones'

**Answer: D**

10. What type of data can be queried using query of queries? (Choose three)

- A. WDDX data
- B. LDAP listings
- C. POP messages
- D. XML documents
- E. Database queries

**Answer: BCE**

11. What statement correctly assigns a variable named fname the value from the s\_fname column of the query object qName at the index location?

```
<cfset colname="s_fname">
```

```
<cfset index=2>
```

- A. <cfset fname =qNames."#colname#[#index#]">
- B. <cfset fname =qNames.#colname#[#index#]>
- C. <cfset fname =Evaluate("qNames.#colname#[#index#]")>
- D. <cfset fname =Evaluate(qNames.#colname#[#index#])>

**Answer: C**

12. What is the purpose of the <cfdump> tag?

- A. display variables for debugging purposes
- B. delete complex variables from an application
- C. display server log information quickly in the browser
- D. email all error messages generated by ColdFusion to the administrator

**Answer: A**

13. Consider an HTML form created with the following text box.

```
<input type="text" name="comment" size="30" maxlength="50">
```

Choose the conditional statement that can be used on the action page to determine if the form field was submitted without content.

- A. <cfif form.comment IS NULL>
- B. <cfif IsEmpty(form.comment)>
- C. <cfif NOT Len(Trim(form.comment))>
- D. <cfif NOT IsDefined(form.comment)>

**Answer: C**

14. What tag statement correctly concatenates two variable strings?

- A. <cfset fullname=firstname, lastname>
- B. <cfset fullname=#firstname# #lastname#>
- C. <cfset fullname=firstname & " " & lastname>
- D. <cfset fullname=firstname + " " + lastname>

**Answer: C**

15. What types of variables must always be prefixed when used? (Choose three)

- A. URL
- B. Form
- C. WDDX
- D. Session
- E. Request
- F. Application

**Answer: DEF**

16. What special file can run automatically after the requested page is processed?

- A. Index.cfm
- B. Default.cfm
- C. Application.cfm
- D. OnRequestEnd.cfm

**Answer: D**

17. What is the output of the loop?

```
<cfset employees = StructNew()>
<cfset val = StructInsert(employees, "1 ", "Pedro ")>
<cfset val = StructInsert(employees, "Rocky", "Pet ")>
<cfloop collection = "#employees#" item = "key">
<cfoutput>#employees[key]#</cfoutput>
</cfloop>
```

- A. 0 1
- B. 1 2
- C. 1 Rocky

D. Pedro Pet

**Answer: D**

18. What statement is true about the colorlist attribute of the <cfchartseries> tag?

- A. can refer to a CSS class
- B. accepts any valid HTML color format
- C. defaults to the colors red, green and blue
- D. contains a list of alternate colors in case default color is not supported

**Answer: B**

19. Analyze the following code:

```
<cfset stState=StructNew()>
<cfset stState.name="CO">
<cfset stState.capital="Denver">
<!--- copy existing structure into new structure --->
<cfset stNewState=stState>
<!--- set values in the new structure --->
<cfset stNewState.name="MA">
<cfset stNewState.capital="Boston">
```

The final values for both structures are MA, Boston. Why is this the case?

- A. Structures can never be copied.
- B. Structures are copied by value.
- C. Structures are copied by reference.
- D. Structures must be referenced by prefix.

**Answer: C**

20. What is used to call a method of a ColdFusion component?

- A. <cfinvoke>
- B. <cffunction>
- C. createObject()
- D. <cfcomponent>

**Answer: A**

ExamSavior.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [HuaWei](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on. And help you pass any IT Certification exams at the first try.

You can reach us at any of the email addresses listed below.
