Exam : **Apple 9L0-004**

Title : Apple Desktop Service Exam

Update : Demo

1. Where is the BEST place to look for information regarding special take-apart tools for an Apple product?

- A. Discussions
- B. Service News
- C. User's manual
- D. Service manual

Correct: D

2. Which section of the Power Mac G5 Service manual is the BEST place to look for instructions for replacing a processor?

- A. Views
- B. Basics
- C. Take Apart
- D. Troubleshooting

Correct: C

3. According to Apple service manuals, what steps should you take before performing any take-apart steps when replacing a part in any Apple product?

- A. Lay the product on its side so it will not fall over.
- B. Update the product's firmware to the latest version.
- C. Discharge the CRT and establish an ongoing ground.
- D. Gather all necessary tools and perform all preliminary steps.
- E. Order all available service parts for the appropriate configuration of the product.

Correct: D

4. A customer asks about RAM speed requirements to upgrade his eMac (USB 2.0). What Apple resource should you refer this customer to?

- A. Downloads
- B. Discussions
- C. User manual
- D. Service manual

Correct: C

5. You require additional information about a specific problem with a customer's Power Mac G5. Which one of the following resources is the Apple-recommended choice for researching the problem?

- A. Downloads
- B. Discussions
- C. User's manual
- D. Knowledge Base

Correct: D

6. A Power Mac G4 (FW 800) boots but produces no startup chime. You have disconnected external microphones and speakers, verified the volume setting and that mute is not checked. What is the next recommended step to resolve this issue?

- A. Reset Parameter RAM.
- B. Replace the internal speaker.
- C. Replace the main logic board.

D.Update to the latest version of Mac OS X.

Correct:A

7.You have just reassembled an iMac (Flat Panel) after replacing its logic board. You start up the iMac and the unit powers on, a startup chime is heard, the hard drive sounds normal, and the unit seems to be booting, but there is only a blank white image displayed on the LCD display. You shut the unit down, connect an external VGA display to the iMac and try again. This time, a normal startup sequence is displayed only on the external VGA display. What is the most likely cause of this problem among the choices listed?

- A.The LCD display is malfunctioning.
- B.A faulty replacement logic board was installed.
- C.The video cable connector was not reattached to the logic board.
- D.The LCD display requires adjustment after logic board replacement.

Correct:C

8.Verifying that a computer functions properly after you repair it ensures that _____.

- A.No new issues have arisen.
- B.Third-party software is working
- C.The original issue has been resolved.
- D.The computer falls under service warranty.
- E.System Preferences settings are set correctly.

Correct:A C

9.A customer states that he cannot open an AppleWorks file. What is the most productive question to ask him FIRST?

- A.Can you open any files?
- B.Can you open other AppleWorks files?
- C.What version of AppleWorks are you using?
- D.Is your Mac connected to a network?

Correct:B

10.You are troubleshooting an intermittent video issue on an eMac. Which of the following is the most appropriate way to approach this problem?

- A.Do nothing. The problem may resolve itself.
- B.Run looping diagnostics to verify the issue.
- C.Follow component isolation steps to resolve the issue.
- D.Replace the Display/Analog Assembly inside the eMac.

Correct:B

11.Which of the following would be the most appropriate question to ask FIRST, when gathering information from customers about a problem with their Apple product?

- A.What is the issue?
- B.What operating system are you using?
- C.Did you turn off the computer improperly?
- D.Is this the first time you have had this problem?

Correct:A

12.You are troubleshooting a Power Mac G5 that will not boot, and emits error tones when powered on. You suspect that the customer may have installed incompatible or faulty RAM, but

you aren't sure. What should you do to verify the RAM requirements for this Power Mac G5?

- A.Call Apple
- B.Order Apple RAM
- C.Check Specifications
- D.Count the RAM sockets on the logic board.

Correct:C

13.Which of the following is the best way to eject a disc when normal methods for ejecting it, such as using the Mac OS Finder or the keyboard, have not succeeded?

- A.Boot into Open Firmware and type 'reset-nvram'.
- B.Restart the computer while holding down the mouse button.
- C.Remove and disassemble the optical drive to remove the disc.
- D.Remove the computer's front bezel and manually pry the disc out of the drive.

Correct:B

14.You have replaced the video card in a Power Macintosh G5. In what THREE ways should you test the repair before returning the system to the customer?

- A.Leave the computer on overnight.
- B.Verify that the original symptom is resolved.
- C.Verify that no new symptoms have occurred.
- D.Run all Apple Service Diagnostic tests for the Power Mac G5.
- E.Run Apple Service Diagnostic video tests for the Power Mac G5.
- F.Start up the computer in Target Disk Mode to test the internal hard drive.

Correct:B C D

15.A customer's Power Mac G5 fails to power on when connected to a known-good power outlet with a known-good power cord. Which of the following steps should be tried FIRST?

- A.Replace the processor(s)
- B.Replace the power supply.
- C.Reset the logic board PMU.
- D.Run Apple Service Diagnostic.

Correct:C

16.Which of the following is ALMOST CERTAINLY a software-related problem?

- A.No video on display
- B.Single beep at startup
- C.No Internet connectivity
- D.iPhoto quits when launched

Correct:D

17.An eMac has no video, but powers on with a normal startup chime, and normal startup sounds from the hard drive. Which of the following steps should you try next?

- A.Update the eMac's firmware.
- B.Replace the eMac logic board.
- C.Replace the eMac Display/Analog Assembly.
- D.Connect a known-good VGA display to the eMac.

Correct:D

18.A customer claims that her Mac mini cannot connect to her AirPort Express network at home.

Her configuration includes an Apple Studio Display resting on top of the Mac mini, and a functioning AirPort Express Base Station 20 feet away. Which of the following choices is the most likely cause of this problem?

- A. The AirPort Express Base Station is too far away.
- B. The Mac mini must be upgraded to Mac OS X v10.4.2 first.
- C. AirPort reception is affected by the display on top of the Mac mini.
- D. The AirPort Express Base Station is not compatible with the Mac mini.

Correct:C

19. Which of the following is ALMOST CERTAINLY a hardware-related problem?

- A. No video at startup
- B. Error beep at startup
- C. Distorted video at startup
- D. Blinking question mark at startup

Correct:B

20. To isolate a video problem as hardware or software on an iMac (Flat Panel), which of the following steps should you try FIRST?

- A. Replace the built-in display.
- B. Reinstall the appropriate Mac OS.
- C. Verify the hard disk with Disk First Aid.
- D. Start up from a known-good startup disc.

Correct:D

21. An eMac (USB 2.0) has a malfunctioning logic board. You replace the logic board. Which of the following diagnostic utilities should you run to verify that the new logic board is functioning properly?

- A. MacTest Pro
- B. Disk First Aid
- C. TechTool Deluxe
- D. Apple Service Diagnostic

Correct:D

22. A customer's eMac (USB 2.0) is freezing intermittently. Which of the following steps should you try FIRST to identify the problem?

- A. Try quick fixes.
- B. Repair the eMac.
- C. Perform a split-half search.
- D. Run appropriate diagnostics.
- E. Escalate the problem to Apple.
- F. Gather information about the problem.

Correct:F

23. A customer states that he cannot access the Internet after connecting his new Power Mac G5 to his cable modem via Ethernet. Which of the following is most likely the cause of this problem?

- A. AppleTalk is not enabled on the computer's Ethernet port.
- B. The computer is not running the latest version of Mac OS X.
- C. A faulty cable was used to connect the computer and the cable modem.

D.The cable modem's Ethernet port is not compatible with the computer's Ethernet port.

Correct:C

24.AirPort Extreme operates under which TWO of the following IEEE standards?

- A.802.11a
- B.802.11b
- C.802.11c
- D.802.11g
- E.802.11h
- F.802.11i

Correct:B D

25.A customer states that she sees an error message appear when she opens her Web browser with her iMac (USB 2.0) using dial-up Internet service. The message displayed in the Web browser is "The specified server could not be found." When she attempts to access the same Web page a second time the Web page is loaded without a problem. Which of the following is the BEST explanation for what is happening?

- A.The iMac needs to warm up before it can access the Web page.
- B.The Web browser is configured to only access Web pages when reloaded.
- C.The iMac's dial-up modem is configured for extra error correction resulting in the delay.
- D.The Web browser attempted to load the page before the iMac's dial-up modem had finished connecting to the Internet Service Provider.

Correct:D

26.A customer claims that her iMac G5 cannot connect to her AirPort Express network at home. Which of the following would be the BEST question to ask her FIRST?

- A.Can any other computer successfully join this network?
- B.Does your ISP support wireless access to the Internet?
- C.What type of wireless card is installed in your iMac G5?
- D.Have you upgraded to Mac OS X v10.4.2?

Correct:A

27.Which of the following AirPort Extreme ports should be used to connect to a DSL or Cable modem for Internet access?

- A.LAN
- B.WAN
- C.Modem
- D.Antenna

Correct:B

28.To utilize Gigabit Ethernet, you must use an Ethernet cable with:

- A.two wires (one pair) present.
- B.four wires (two pairs) present.
- C.six wires (three pairs) present.
- D.eight wires (four pairs) present.

Correct:D

29.Which of the following is a valid reason to perform a soft reset on an AirPort Extreme Base Station?

- A.to update base station firmware
- B.to reset the base station password
- C.to return the base station to its default settings
- D.to erase AirPort client software from Mac OS X

Correct:B

30.A customer complains that his Power Mac G5 will not allow a number of other workers in his office to share his files simultaneously. All the other computers are iMac G5 that are networked and configured properly. According to the Apple General Troubleshooting Flowchart which of the following is the best area to explore FIRST?

- A.Does the customer have a firewall enabled?
- B.Is the customer's Power Mac G5 Ethernet port faulty?
- C.How many simultaneous users does the customer's network have?
- D.What version of Mac OS X is the customer's Power Mac G5 running?

Correct:C

ExamSavior.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [HuaWei](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on.
