

# The best learning assistants

**Exam** : **Apple 000-223**

**Title** : IBM System p Administrator

**Update** : Dmeo

1. You are offering FTP services over the Internet to users who may be behind a firewall. You should advise users to enable passive FTP if they are behind a firewall that \_\_\_\_\_.

- A. requires SFTP
- B. has FTP tunneling disabled
- C. does not allow FTP connections
- D. does not allow all FTP connection modes

Correct: D

2. Which task can you perform remotely with Remote Desktop that you CANNOT accomplish locally using Server Admin?

- A. Start and stop services on the server.
- B. Administrate a server without a monitor.
- C. Administrate multiple servers simultaneously.
- D. Configure an additional Ethernet port on the server.

Correct: D

3. In Mac OS X Server, you configure password policies in \_\_\_\_\_. (Choose TWO.)

- A. Workgroup Manager, at the basic user panel
- B. Workgroup Manager, as an advanced user option
- C. Workgroup Manager, as part of Accounts preferences
- D. Server Admin, as part of Directory Services settings
- E. Server Admin, as part of Open Directory settings

Correct: B E

4. You have defined managed preferences for the Guest Computers account in Workgroup Manager. Those preferences apply to \_\_\_\_\_.

- A. computers named on the Guest Computers list only
- B. any bound computer from which a user connects to the server with Guest access
- C. any bound computer that is not a member of a named computer list on the server
- D. computers that are members of computer lists that have Guest access to the server

Correct: C

5. Which statement is true of the Software Update service in Mac OS X Server v10.4?

- A. It restricts access to updates based on Ethernet addresses.
- B. It can be configured to automatically download all updates from Apple, but serve only selected updates.
- C. It allows you to create software update packages and distribute them on a local network, alongside updates provided by Apple.
- D. Turning it on prevents users from accessing Apple's update server directly, and restricts them to your server for Apple software updates.

Correct: B

6. Which three password policy options can you select in Mac OS X Server v10.4? (Choose THREE.)

- A. Log failed login attempts.
- B. Use Kerberos passwords.
- C. Use Clear Text passwords.
- D. Establish password criteria.
- E. Set length of expiration intervals.

F. Identify password storage location.

Correct: A D E

7. Sharing files over NFS is NOT secure because NFS \_\_\_\_\_.

- A. relies on Kerberos
- B. uses Clear Text passwords
- C. uses MAC address authentication
- D. does not require user authentication

Correct: D

8. Where on a client machine is managed client data stored after the user logs in?

- A. /Library
- B. /System/Library
- C. /Library/Preferences/
- D. ~/Library/Preferences/

Correct: D

9. The primary role of shadow files in NetBoot is \_\_\_\_\_.

- A. to allow the client to boot diskless
- B. to provide a temporary writable space
- C. to allow NetBoot to run in read-only mode
- D. to allow NetBoot clients to edit the NetBoot image

Correct: B

10. In Mac OS X Server v10.4 Workgroup Manager, the Often preference lets users \_\_\_\_\_.

- A. make preference setting changes that are persistent
- B. define the number of times a preference setting can be changed
- C. change a preference setting for the duration of their login session
- D. define a calendar schedule for resetting a preference to its default value

Correct: C

11. What service can you use in conjunction with a firewall to provide security for your users, while letting them share a single public IP address?

- A. Kerberos
- B. Web Mail
- C. Virtual Private Network (VPN)
- D. Network Address Translation (NAT)

Correct: D

12. On a server that has Mac OS X Server v10.4 you configure a firewall that allows web service for the IP address range 10.1.7.6/16 only. Which two of these addresses will be DENIED access to the web server? (Choose TWO.)

- A. 10.1.7.6
- B. 10.2.7.6
- C. 10.1.7.8
- D. 10.1.9.6
- E. 17.1.7.6

Correct: B E

13. In Mac OS X Server, the DHCP client ID \_\_\_\_\_.

- A.authenticates the client to the DHCP server
- B.configures the DHCP server to identify the client's subnet
- C.lets the DHCP server create an encryption key for the client
- D.is an optional tool to let a DHCP administrator uniquely identify clients

Correct:D

14.What is the correct order of precedence for Managed Preferences according to the override rule?

- A.Computer List, Groups, User
- B.User, Groups, Computer List
- C.Computer List, User, Groups
- D.User, Computer List, Groups

Correct:D

15.What minimum hardware configuration does Apple recommend for Mac OS X v10.3 and for Mac OS X v10.4 NetBoot clients?

- A.Mac OS X v10.3 NetBoot clients: 100 Base-T Ethernet and 128 MB RAM Mac OS X v10.4 NetBoot clients: 100 Base-T Ethernet and 256 MB RAM
- B.Mac OS X v10.3 NetBoot clients: 10 Base-T Ethernet and 128 MB RAM Mac OS X v10.4 NetBoot clients: 10 Base-T Ethernet and 256 MB RAM
- C.Mac OS X v10.3 NetBoot clients: 100 Base-T Ethernet and 128 MB RAM Mac OS X v10.4 NetBoot clients: 100 Base-T Ethernet and 128 MB RAM
- D.Mac OS X v10.3 NetBoot clients: 100 Base-T Ethernet and 256 MB RAM Mac OS X v10.4 NetBoot clients: 100 Base-T Ethernet and 256 MB RAM

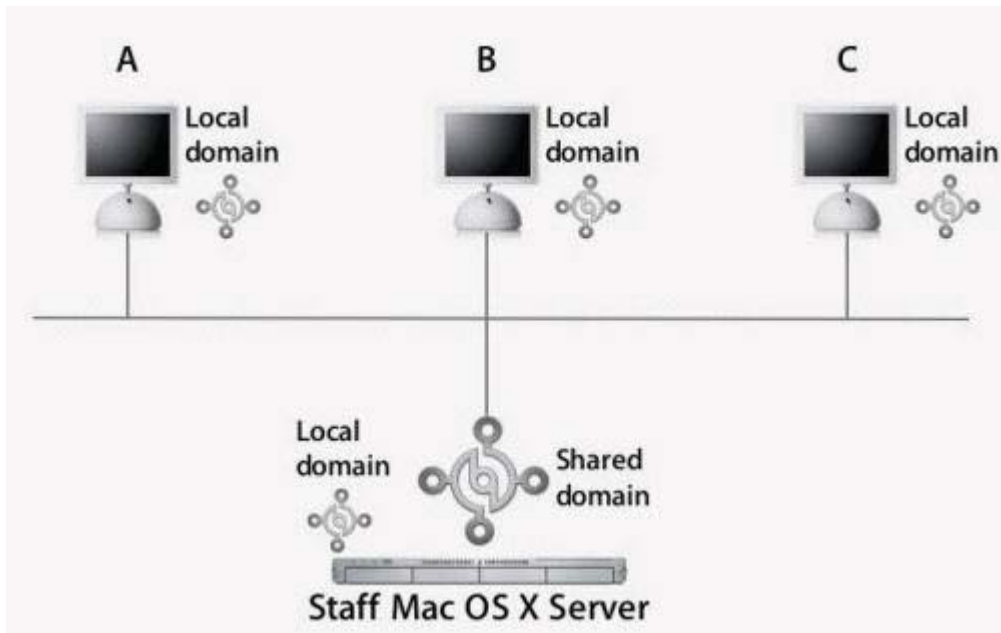

Correct:A

16.Which managed preference is available for Computer List management, but not for Group or User management?

- A.Internet preferences
- B.Application preferences
- C.Energy Saver preferences
- D.Universal Access preferences

Correct:C

17.Click the Exhibit button and examine the graphic, then answer the question below. In the graphic, the Staff Mac OS X Server hosts a shared directory domain, to which the three client computers, A, B, and C, are bound. Which two statements are true of this network? (Choose TWO.)

- A. The Directory Access application was used on the Staff Mac OS X Server to bind computer A to its parent domain.
- B. The Server Assistant application was used on the Staff Mac OS X Server to bind computer B to its parent domain.
- C. Users defined in the Shared domain of the Staff Mac OS X Server can log in to computer A.
- D. Users defined only in the Local domain of computer C can log in to the Staff Mac OS X Server.
- E. Users defined only in the Local domain of the Staff Mac OS X Server cannot log in to computer C.

Correct: C E

18. In Mac OS X Server v10.4, what tool lets you share print queues?

- A. Server Admin
- B. Printer Setup Utility
- C. Workgroup Manager
- D. Print & Fax pane of System Preferences

Correct: A

19. What tool lets you change the role of the Open Directory service in Mac OS X Server v10.4?

- A. Server Admin
- B. Directory Access
- C. Workgroup Manager
- D. Open Directory Admin

Correct: A

20. In Mac OS X Server v10.4, you should enable strict locking when you share a volume over \_\_\_\_\_.

- A. FTP only
- B. AFP only
- C. SMB only
- D. AFP and FTP
- E. AFP and SMB

Correct:E

21. Mac OS X Server v10.4 added which three new access control features? (Choose THREE.)

- A. Groups can own files.
- B. Files can have multiple owners.
- C. Groups can contain other groups.
- D. Users can belong to more than 16 groups.
- E. What was the Everyone user is now the Everyone group.
- F. Any user can set Access Control Lists (ACLs) on any folder s/he owns.

Correct:A C D

22. You are configuring a user account in Workgroup Manager. If you want the user to authenticate via Kerberos, which password type should you choose?

- A. Crypt
- B. Shadow
- C. Open Directory
- D. Kerberos Distribution

Correct:C

23. Which computer meets Apple's minimum recommended requirements for installing Mac OS X Server v10.4?

- A. iMac G3 (Bondi Blue) / 256 MB RAM / 6 GB available disk space
- B. Power Mac G4 / 512 MB RAM / 3 GB available disk space
- C. Power Mac G4 / 256 MB RAM / 4 GB available disk space
- D. iBook G4 / 256 MB RAM / 6 GB available disk space

Correct:C

24. In Mac OS X Server v10.4, the new feature, Preference Manifests, allows Workgroup Manager to \_\_\_\_\_.

- A. access application preferences
- B. associate preferences to a computer record
- C. store a common set of preferences in a directory
- D. read related blocks of managed preferences at user login

Correct:A

25. Immediately after a successful installation of Mac OS X Server v10.4, which three directory configurations can you select in Server Assistant? (Choose THREE.)

- A. NetInfo Parent
- B. Standalone Server
- C. Open Directory Replica
- D. Open Directory Master
- E. Active Directory Master
- F. Connected to a Directory System

Correct:B D F

26. Where in the graphical user interface do you configure Service Access Control Lists (SACLs)?

- A. In Server Admin, under the Settings pane associated with general services
- B. In Server Admin, under the Settings pane associated with each service
- C. In Workgroup Manager's Accounts User or Groups panes

D. In Workgroup Manager's Sharing Access pane

Correct: A

27. You are creating an SMB share point on a server with Mac OS X Server v10.4. Users on client computers will create files and folders on the share point. Which two statements are true of newly created files and folders? (Choose TWO.)

A. You can assign permissions on shared folders.

B. Shared files' permissions are defined by the umask.

C. You can set shared files to inherit permissions from the parent folder.

D. Owner and Group always get Read & Write permissions to shared files.

E. The permissions you set for files and folders do not apply to administrators.

Correct: A C

28. By default, FTP service in Mac OS X Server v10.4 can \_\_\_\_\_ files on-the-fly, as the files are requested. (Choose THREE.)

A. encode

B. encrypt

C. archive

D. compress

E. unencrypt

F. uncompress

Correct: A C D

29. An installation package includes which three components? (Choose THREE.)

A. an information plist

B. a .txt file with size calculations

C. a .txt file with the Finder layout

D. a folder containing required fonts

E. an archive of the files to be installed

F. a .txt file identifying the package contents

Correct: A B E

30. Which procedure will automatically configure Mac OS X Server v10.4 on a computer?

A. Enter the configuration details via Setup Assistant.

B. Save the configuration details in an XML file, config.plist, and put the file on a mounted volume on the server.

C. Save the configuration details as an entry in a running directory service, with the MAC address of the server as its name.

D. Save the configuration details as a text file, with the server host name as its name, and store the file on a mounted volume on the file server.

Correct: C

ExamSavior.com was founded in 2006. The safer,easier way to help you pass any IT Certification exams . We provide high quality IT Certification exams practice questions and answers(Q&A). Especially [Adobe](#), [Apple](#), [Citrix](#), [Comptia](#), [EMC](#), [HP](#), [HuaWei](#), [LPI](#), [Nortel](#), [Oracle](#), [SUN](#), [Vmware](#) and so on. And help you pass any IT Certification exams at the first try.
